10. USER MANUAL

1. Introduction

Welcome to the Fixitwala: Home Services App! This user manual will guide you through using the app to find and book various home services conveniently.

2. Getting Started

To get started, download the Home Services App from the GitHub, Once installed, launch the app.

3. User Registration

Provide necessary details such as name, email, phone number, and create a password to register.

4. User Authentication

Log in using your registered email/phone number and password.

Use biometric authentication (fingerprint, face recognition) if enabled on your device.

5. Home Screen

Explore featured services and promotions.

6. Select Service

Use the Grid View of listed services to find specific services or browse categories.

Filter search results based on location, ratings, and price.

7. Booking Services

Select a service provider based on reviews and ratings.

Call or chat to choose a convenient date and time for the service.

Provide additional details if necessary.

Confirm the booking and receive a confirmation notification.

8. Managing Bookings

View upcoming and past bookings in the "Booking History" section.

9. User Profile

Update personal information such as name, email, and phone number.

View booking history and preferences.
